

February 14, 2016

This is just a quick note to let everyone know that we are starting the process of rebuilding our web pages. The Software that we have used for years is no longer supported so we need to transition the pages to another software package.

Additionally – it was brought to our attention that we have not made many changes – and that is true – the reason is our concern that if the site went down we could not get it back up -- see the first paragraph – the software is out of date and thus no technical support if needed.

As we are going to rebuild the site – we hope to make it more robust – and in doing so, what are the things that you would like to see added? If you will send a note to George he will compile the change requests and we can discuss them during our business meeting at our reunion.

Please bear with us as we make this transition – and for those who have a concern on our renewing our domain name – that has been taken care of and is on autopilot so that we do not have to worry about it. Appreciate the member bringing it to our attention that it was about to expire – but we had already started the process – it is nice to have good backup though – just in case we miss something.

See you at the reunion.

George.
